

Andrey Shadrin

*Project Director &
Software Development Leader*

Gumpfenbergstr. 8, 93053
Regensburg, Germany
☎ +49 151 1565 0827
✉ ashadrin@gmail.com

Objective

Experienced leader in managing complex embedded software projects and electronics systems, driving improvements among all phases of the product development, through innovative approaches in operational excellence, project management, electronics system design & architecture and continuous delivery.

A self-driven professional, I continuously seek new knowledge to support team success and add value to the company. My international experience and collaborative mindset enable me to build strong, effective partnerships with both internal and external stakeholders.

Personal Details

Date of Birth July 9, 1983 in Almaty
Marital Stat. Married, 1 Child

Employment

- Present– **Project Director, GDE-ED**, BSH Haushaltgeräte GmbH., Regensburg, Germany
07/2023 As a project director and a chief architect of electronics systems, I drive and support different organizational topics in the functional area of System Engineering: electronics system- and software architecture, system project management, electronics components project management:
- Electronics System Project Organization - structuring and coaching electronics system projects including their sub-system projects and their software projects,
 - Electronics System Platform Architecture - balancing between legacy, current and new generation of electronics system platform architectures including software design,
 - Operational Excellence - improving the management of electronics projects with SW development,
 - Rollout of a new organizational structure "Value Chain" in the Electronics Development.
- 06/2023– **Director of Software Development, GDE-ED**, BSH Electrical Appl. Ltd., Nanjing, China
11/2021 As the leader of the Software Department at BSH China, overseeing a team 40+ developers:
- led five software development teams specializing in embedded software and algorithms for ECUs (motors, sensors, power supply), application and HMI software for Linux, and SW/SW integration for washing machines, dryers, refrigerators, and ventilation systems,
 - established and expanded the Software Project Management Office (PMO) to enhance project execution and inter-departmental collaboration, became backbone for system project managers,
 - adapted software development methodologies and introduced SW KPIs, reorganized software teams and introduced new internal roles to improve efficiency and effectiveness,
 - introduced integration strategy to improve the cross-teams and -stakeholders collaboration as well as SW products handover (up to 20% resources efficiency and up to 50% in project start-phase),
 - onboarded external software development partners from China/Vietnam to expand the software development pool and enhance operational capabilities: reduced fixed costs: ca. 5 Mio. Euro per annum since 2022; improved the application software development cycle by 30% .
- 06/2023– **Head of Software Group, GDE-ED**, BSH Electrical Appl. Ltd., Nanjing, China
07/2019 As the leader of a user interface SW development team in BSH China I was responsible for:
- ramping up a new team with 8 developers and building up their competences,
 - setting up interfaces between SW teams, SW experts and SW Architects within ED globally,
 - defining best solutions with product management teams for their products in BSH globally,
 - providing consulting to marketing, designers, product teams of product divisions in BSH globally,
 - achievements: brought to mass production new HMI SW platform for different home appliances.

- 12/2019– **Senior Project Manager**, *PED*, BSH Electrical Appliances Ltd., Nanjing, China
- 01/2018 As a program manager of SystemProject House in BSH China I was responsible for:
- the introduction of a low/mid-end embedded platforms to stakeholders in China,
 - setting up a new working mode between different projects teams within BSH globally,
 - building up competences and interfaces for development teams to provide a field application engineering support to product teams, factories and other stakeholders in BSH China,
 - establishing interfaces and collaboration modes between stakeholders within BSH globally.
- As a project manager and a technical lead of a new high-end embedded platform I was responsible for:
- ramping up a new team, 20+ developers, building up competences and managing the project team,
 - the definition of a high-end embedded platform to support new multimedia/digital use cases,
 - elaborating product system requirements to select/source SoC and OS for the embedded platform.
- 12/2017– **Embedded Platform Architect**, *PED*, BSH Haushaltgeräte GmbH, Regensburg, Germany
- 05/2015 As an embedded platform architect in innovation embedded systems cluster I designed a new generation embedded platform covering three performance classes: low/mid/high-end:
- collecting and elaborating system requirements from different home appliance categories,
 - prototyping reference embedded platform for new use cases, e.g. advanced user interaction.
- 04/2015– **Microcontroller SW/HW Engineer**, Continental Automotive GmbH, Regensburg, Germany
- 04/2012 As a leading micro-controller engineer and an MCU project leader I accomplished the introduction of new generation multi-core micro-controllers for engine control units (ECUs).
- acted as a technical contract person between MCU semiconductor suppliers (Infineon, Freescale) and internal stakeholders: SW-, HW-, Tooling-, QM- and PU departments,
 - validation of micro-controllers: communication interfaces: LIN, SPI, I2C, CAN; non-volatiles memory, ADC, DMA, TPU, EBI, etc.,
 - supported ECU rollout and be micro-controller expert for return field ECU Failure Analysis.
- 06/2010– **Research Assistant**, Chair Prof. Dr. Paul, Saarland University, Saarbrücken, Germany
- 04/2006 Implemented a RISC processor in Verilog, simulated and tested it at RTL level, deployed and tested it on a FPGA board; created a prototype of a distributed hardware network between ECUs.

Education

- 2007–2012 **Doctoral Studies, Phd**, Computer Science, Saarland University, Germany
Thesis: “Mixed Low- and High Level Programming Language Semantics and Automated Verification of a Small Hypervisor”.
- 2005–2006 **M.Sc.**, Computer Science, Saarland University, Germany
Thesis: “Design and Implementation of the Portmapper and RPC Primitives in the Context of the Simple Operating System.”
- 2000–2005 **Diploma**, Software Engineering, Khabarovsk State Technical University, Russia
- 2000 **High School**, High School 103, Almaty, Kazakhstan

Skills and Experience

- Hard Skills Embedded System Design, Project Management, DevOps, Agile, Coding.
- Soft Skills Leadership, Problems Solving, Continuous Improvement, Critical Thinking, Flexibility.
- Area of Interests Embedded Systems, Autonomous Driving, Computer Vision, Applied AI, CI/CD

Language skills

- German, English Fluent
- Russian Mother tongue
- Mandarin, Italian Basic Knowledge

Hobbies

Biohacking, Traveling in Asia, Reading Novels, Cycling Tours in Europe and in Asia, Football

Regensburg, 18 Dez 2024

Andrey Shadrin
